

CBECC-Com Input Data Model changes from 2016.3.0-SP1 (5302, Dec 2017) to 2016.3.0-SP2 (5583, July 2018):

The compliance engine includes a backward compatibility mechanism that automatically addresses most data model changes, where property names or enumeration strings are revised or removed as the data model evolves. This mechanism also includes logic to write messages to project logs when backward compatibility for certain properties is expected to impact compliance analysis of a previous vs. current version of the tool. Additions to the data model or changes that require user input to determine the appropriate translation of properties/enumerations from previous to a current tool version are not something that the compliance engine supports in most cases.

Proj	Project		
CHANGED			
StdsVersion	StandardsVersion default: -1 1: "Compliance2014"	Enumeration	- Defaulted Removed outdated selection
ADDED			
PrescriptiveDayltgException	PrescriptiveDaylightingException default: 0 1: "Yes" 2: "No"		
ExcptCondWtrHtrPrscrp	ExceptionalConditionWaterHeaterPrescriptive default: 2 1: "Yes" 2: "No"		
AnnualSolFrac	AnnualSolarFraction	Float	- CondRequired input, 0 <= Value <= 0.99
SimVarsFlagSetAll	SimulationVariablesFlagSetAll	Integer	- Optional input
SimVarsHVACSecTempFlow	SimulationVariablesHVACSecondaryTemperatureFlow	Integer	- Optional input
SimVarsHVACZnTempFlow	SimulationVariablesHVACZoneTemperatureFlow	Integer	- Optional input
SimVarsHtRcvry	SimulationVariablesHeatRecovery	Integer	- Optional input
